

# Evanildo Daniel Jibambo Simango

## Junior Data Engineer

ivansimango02@gmail.com | +91 704 655 1952 | Mozambican National | Open to Relocation

### PROFESSIONAL SUMMARY

Motivated Junior Data Engineer with a Bachelor of Computer Applications specialising in Big Data Analytics (Parul University, 2026) and hands-on experience designing and managing data pipelines, databases, and analytics infrastructure. Experienced in building end-to-end data workflows from collection to visualisation, with practical knowledge of Google BigQuery, SQL, Firebase, and Python. Developed and maintained a real-time data layer for QuickMoz, a live service marketplace in Mozambique. Eager to bring strong data engineering fundamentals to a dynamic data team.

### TECHNICAL SKILLS

|                    |                                                                |
|--------------------|----------------------------------------------------------------|
| Data Engineering   | ETL pipeline design, Data modelling, Data warehousing concepts |
| Query & Database   | SQL, MySQL, Google BigQuery, SQLite, Firebase (NoSQL)          |
| Data Processing    | Python (Pandas, NumPy), Jupyter Notebook, Google Colab         |
| Data Visualisation | Power BI, Microsoft Excel (Pivot Tables), Google Sheets        |
| Big Data           | Big Data Analytics, Data preprocessing & cleaning              |
| Backend            | Django, FastAPI, REST API, Firebase real-time database         |
| Tools              | Git/GitHub, VS Code, Google Cloud Platform basics              |

### PROFESSIONAL EXPERIENCE

#### Marketing & IT Adviser — Data & Systems

Sharma Real Estate | Vadodara, India | 2024 – 2025

- Designed and maintained data pipelines to collect, process, and visualise sales and marketing data
- Built Power BI dashboards connected to structured Excel and database sources for real-time KPI monitoring
- Managed and queried client and property databases using SQL to support business reporting
- Structured and cleaned raw data from multiple sources to ensure accuracy and consistency for reporting
- Automated reporting workflows, reducing manual data processing time for the management team

#### Freelance Data & Web Developer

Self-employed | Remote | 2023 – Present

- Designed and managed MySQL and Firebase databases for multiple client web and mobile projects
- Built data collection layers and REST API integrations to feed structured data into reporting systems
- Used Google BigQuery to query and analyse large client datasets for business insights
- Delivered custom Power BI and Excel dashboards tracking KPIs for small business clients
- Analysed Meta Ads campaign data (CTR, ROAS, conversions) and structured findings into actionable reports

### PROJECTS

#### QuickMoz — Data Pipeline & Analytics Infrastructure

Firebase | Django | Python | Power BI | REST API — Live product, Mozambican market

- Sole developer — designed and built complete data infrastructure for a live service marketplace
- Built real-time data collection layer using Firebase, feeding structured data into analytics dashboards
- Designed data models for users, services, transactions, and platform activity from scratch
- Developed ETL-style processes to clean, transform, and load data for Power BI reporting
- Monitored data quality and pipeline performance to ensure reliable insights for product decisions

#### Big Data Analytics — Academic Projects

Python | Pandas | NumPy | Jupyter Notebook | Google BigQuery

- Completed data preprocessing, cleaning, and transformation projects using Python and Pandas
- Worked with large datasets in Jupyter Notebook and Google Colab for analysis and modelling tasks
- Applied data modelling and warehousing concepts through university Big Data Analytics specialisation

### EDUCATION

#### Bachelor of Computer Applications (BCA) — Specialisation: Big Data Analytics

Parul University, India | Pass Out 2026

### LANGUAGES

| Portuguese | English  | Spanish | French |
|------------|----------|---------|--------|
| Native     | Advanced | Basic   | Basic  |

### SOFT SKILLS

Data-driven thinking · Problem solving · Attention to detail · Autonomous work · Clear communication · Fast learner · Cross-cultural collaboration
