

Evanildo Daniel Jibambo Simango

Junior Machine Learning Engineer

ivansimango02@gmail.com | +91 704 655 1952 | Mozambican National | Open to Relocation

PROFESSIONAL SUMMARY

Driven Junior ML Engineer with a Bachelor of Computer Applications specialising in Big Data Analytics (Parul University, 2026) and practical experience applying machine learning and data processing techniques to real-world problems. Proficient in Python, TensorFlow, Pandas, and NumPy, with hands-on experience in data preprocessing, model building, and AI-assisted development. Built and deployed production applications integrating data-driven features, including QuickMoz, a live service marketplace in Mozambique. Passionate about applying ML to solve meaningful problems and eager to grow within a forward-thinking AI or data science team.

TECHNICAL SKILLS

ML & AI	TensorFlow, Keras, Scikit-learn basics, Neural Networks (theory)
Data Processing	Python (Pandas, NumPy), Data preprocessing & cleaning, Feature engineering
Development	Jupyter Notebook, Google Colab, Python scripting
Data & Analytics	Google BigQuery, SQL, Power BI, Statistical Analysis
Backend & APIs	Django, FastAPI, REST API, Firebase
Vibe Coding	AI-assisted development — rapid prototyping with LLM tools
Tools	Git/GitHub, VS Code, Google Cloud Platform basics

PROFESSIONAL EXPERIENCE

Marketing & IT Adviser — Data & Analytics

Sharma Real Estate | Vadodara, India | 2024 – 2025

- Applied data analysis techniques to property sales data, identifying patterns that improved conversion rates
- Built predictive reporting models in Excel and Power BI to forecast campaign performance
- Processed and cleaned raw datasets from multiple sources to ensure data quality for analysis
- Used data-driven insights to optimise digital marketing spend and improve campaign ROI
- Communicated analytical findings clearly to non-technical management through visual dashboards

Freelance Developer & AI Tools Specialist

Self-employed | Remote | 2023 – Present

- Built and deployed AI-assisted applications using vibe coding methodologies and LLM-powered tools
- Applied data preprocessing and cleaning pipelines to client datasets for analysis and reporting
- Analysed Meta Ads performance data using statistical techniques to identify trends and optimise campaigns
- Developed data-driven web and mobile applications integrating REST APIs and real-time databases
- Rapidly prototyped ML-adjacent features using AI development tools, significantly reducing build time

PROJECTS

QuickMoz — Data-Driven Marketplace Application

Flutter | Django | Firebase | Python | Power BI — Live product, Mozambican market

- Sole developer — built a complete data-driven service marketplace from concept to production
- Designed data models and real-time data pipelines using Firebase and Django REST API
- Built analytics dashboard tracking user behaviour, transactions, and platform growth metrics
- Applied data preprocessing techniques to clean and structure platform data for reporting

Machine Learning & Big Data — Academic Projects

Python | TensorFlow | Pandas | NumPy | Jupyter Notebook | Google BigQuery

- Built and trained neural network models using TensorFlow and Keras as part of ML coursework
- Completed end-to-end data preprocessing and cleaning pipelines using Pandas and NumPy
- Worked with large datasets in Jupyter Notebook and Google Colab for analysis and model evaluation
- Applied Big Data Analytics techniques through university specialisation including data modelling and BigQuery

EDUCATION

Bachelor of Computer Applications (BCA) — Specialisation: Big Data Analytics

Parul University, India | Pass Out 2026 | Coursework: ML, AI, Big Data, Cybersecurity

LANGUAGES

Portuguese	English	Spanish	French
Native	Advanced	Basic	Basic

SOFT SKILLS

Analytical thinking - Curiosity & continuous learning - Problem solving - Attention to detail - Autonomous work - Adaptability -
